- Yashika Soni - 3BCom(H) (Senior Associate)
- Mohammad Shadab Shagoo - 3BCom(H) (Senior Associate)

DID YOU KNOW THAT?

The Butterfly Effect: The concept from chaos theory is that a small event can have far-reaching, unpredictable consequences. It highlights the interconnectedness of systems and how minor actions can lead to significant outcomes.

The Color Pink: Pink was not a color in the human vocabulary until relatively recently. Ancient languages did not have a specific term for pink, and it wasn't until the 17th century that the color was named.

World's Largest Desert: The largest desert in the world is not the hot, sandy Sahara Desert—it's actually Antarctica. A desert is defined by its low precipitation, not its temperature.

Pineapples Grow on Plants, Not Trees: Pineapples grow close to the ground and are actually composed of multiple berries that fuse together around a central core.

Celebrating World Environment Day with SDG cell

On June 5th, 2023, the Sustainable Development Goals (SDG) Cell at Christ (Deemed to be University), Delhi - NCR, marked World Environment Day with a profound commitment to environmental stewardship. The event brought together nine enthusiastic participants, including faculty members and student coordinators, who actively engaged in green initiatives. Beyond the confines of the campus, a symbolic tree plantation drive was held, symbolizing the institution's dedication to fostering a greener planet. This endeavour underscored the significance of collective action and awareness in preserving our environment.

The heart of the celebration lies in promoting environmental consciousness and sustainable practices. Participants gained valuable insights into practical steps for implementing eco-friendly initiatives and spreading awareness among peers and the community. A key takeaway from the event was the realization that individual actions, when combined, hold immense power in safeguarding our planet. This World Environment Day ceremony served as a poignant reminder of each person's role in upholding the well-being of our global home.

The SDG Cell's efforts culminated in a tree-planting drive beyond the campus borders. Nine faculty members and cell coordinators participated, cementing their dedication to leaving a positive environmental legacy. This collective endeavour radiated the spirit of sustainability and echoed the University's commitment to championing a cleaner, greener future. The event is a testament to the potential of united actions to effect meaningful change, setting a shining example for continued environmental endeavours.

The SDG Cell's World Environment Day celebration was not merely an event but a testament to the institution's resolute dedication to preserving our planet. The combination of informative sessions, symbolic actions, and passionate participation instilled a renewed sense of responsibility in all involved. As we move forward, let's carry on the lessons learned, and the inspiration garnered, making conscious choices and working collectively towards a more sustainable and harmonious world.

CREATIVE CORNER

RESOUNDING FREEDOM

By Anandi
3BCOMH

Independence day, a day of pure delight.
When Indians freedom shore so bright
On the day 15th of August, we stand tall
Celebrating the day we answer the call

A nation United, with a heart entwined
Throwing of the chains of chronial grind
With the courage and determination we fought
For our independence, freedom we sought

From the ashes of struggle, a phoenix did rise
Our nation is proud, with starts in eyes
The tricolor unfurled, fluttering with pride
As we embarked on a journey side by side

From the northern mountains to Southern seas
India's tapestry woven with unity and peace
Language as diverse as colors in the sky
A rich fusion of cultures, soaring high

I honor, the heroes who fought violently
Their courage and sacrifice set Indians free
From Mahatma Gandhi is non violence might
To Subhash Chandra Bose daring fights

SEEKING LIGHT AMID SHADOWS

By Vaishnavi Tyagi
3BCOMH

Murk of the history,
Fade into the night.
As I file into the fate,
And embrace the light.
The world is full of riddle,
And secrets yet to be set up.
But I am ready to take on the challenge,
And explore what is each around.
I may have changed along the way,
But I am still the same at my core.
And I am agitated to see what the future holds,
As I continue to grow and explore.

CLASS PHOTOGRAPHS

BATCH OF 2020 - 2023
