In This Issue

Experiences of students

Editor's Message

Greetings and Welcome to the sixth issue of the Newsletter of School of Commerce, Finance and Accountancy, Christ (Deemed to be University) Delhi, NCR- "The-Greycells". The Newsletter is articulate experiences of students in Christ.

Experiences stuff our eyes with a smile.
We go along with beautiful light.
We just need to fight, for all the right.
We will definitely rise, just need to be wise
Step by step fly, don't be shy.
Our dreams will come true, experiences tell us, just try
Don't stop or afraid, experiences teach you to be strong and great
That's why experiences stuff your eyes with a smile.

In this issue, The Greycells reflects the experiences of students and I am sure it will leave a smile on your face.
Warmest Regards

Team

Dr. Nitika Sharma (Faculty Coordinator)

Gary Hamel rightly said, "Great accomplishments start with great aspirations". It was right a year back when we sailed off as a team and visioned our voyage of working together firmly as a unit of keen and passionate individuals. In the beginning, we had several objectives and propositions in mind but making it a reality was not at all a cakewalk for any of us. Notwithstanding the fact that the work was tough, but the well-designed and skilful activities of the members of reckons aisle and the exceptional coordination by the students made it possible for us to successfully execute our plan of action and bring to the department its very own newsletter every month. Right from PRAYAAN to DAKSH and then finally to the unprecedented successful inter-collegiate fest ELYSIAN, provided us with the opportunity to pen down the enormous amount of hard work and effort put in by the various student leaders and volunteers all around the year to make it a happening and lively one for the students even during these tough times.

The newsletter did not just bring forward the plethora of pursuits arranged by the School of Commerce, Finance and Accountancy but also helped us in finding and recognizing the talent and potential of a number of students of our department who constantly sent us their articles for the Student's corner and mesmerizing us with their stunning poetries.

It indeed took us a number of sleepless nights and panic-struck days to put everything into place but the experience was no doubt an enriching one. We have learnt so much in the process that every bit of hard work seems worth it. This whole journey would never have been possible without the constant support of our faculty coordinator Nitika Ma'am, who provided us with such useful insights and was ever ready to help us. It was due to collective team effort and support from the department that we succeeded in completing an entire year so effortlessly.

Experiences are achievements in disguise, regardless of the type, they leave behind an impact on the individual's way of doing things. They are incidents that bring a change for a lifetime. "Experiences are the best teachers and the worst experiences teach the best lessons" Keeping this quote in mind I would like to highlight my experience in Christ University as a student and as a member of SWO. I joined this prestigious university after learning about the discipline, the teachings and the opportunities provided. I was very sure which course to persuade, so I enrolled and started my college life. Unfortunately, we had to begin in the online mode, but this experience brought in an excellent opportunity to showcase our talents and expertise through a different mode! It was a little difficult to adapt to the process of studying online but we soon got used to it and the faculty played a huge role in bridging this gap. I interviewed for the emcee committee and Natyarpana and I got selected in both the committees. These committees were under the wing of SWO, being a member of SWO I experienced many challenges in different events and gatherings but every time I learnt something new and was able to add to my personality. After almost 7 months of learning online, our college decided to begin on-campus teaching. We were overwhelmed and this time around being on campus and learning in class, interacting with the faculty made us happier than ever. Hosting events in the auditorium which had only seemed like a dream was an inexpressible moment, dancing in the studio with our seniors and batchmates made us feel like we attained freedom. The experience was thoroughly enjoyed by each one of us who had reached the campus. But, the second wave of covid19 hit us again and we had to revert to online teaching but I am very lucky to have experienced the on-campus life even for a couple of months. I have been in a fixed time and again when it came to being on stage but the student leaders were always present to make us feel at home and be confident. The past 1 year of being in Christ and SWO has shown me how to cope with every situation and make every experience worth it!

CHRIST Consulting is a part of CHRIST (Deemed to be University) and is a result-driven business consultancy centre. It has been an honour and a great learning opportunity for me to be part of the past academic year. Being a Student Associate at CHRIST Consulting has given me exposure in all the possible fields that I could think of to upscale my career further. From marketing to finance to writing content and designing graphics for the collaborations, it has instilled me with all the knowledge and skills that are required for the growth of a student.

I joined CC in August'20 when the pandemic hit us with all the unexpected and devastating effects. Instead of becoming a prisoner to those I joined CC and explored the opportunities that it had to offer me. Leading teams and handling situations made me realize that there is so much more to learn and unlearn from these situations. As I hopped from one project to another and from one responsibility and another greater one, I grew as a more responsible, organized and persistent human being.

Leading the flagship program of CHRIST Consulting, I'm very thrilled to be its part of the next academic year and to heighten my dexterity further.

"I didn't fail, it was a learning experience"

So many people look at art and say that they wish they could do that. People are fascinated by the creative spark that artists have. Learning is based on experience. There may be external aids to learning, but it has to be built on experience. Every experience, therefore, has learning potential. But learning does not take place automatically just because of experience. One has to get vigorously engaged with it, it is rightly said that experience has to be arrested, examined, analysed, considered and negated to shift it to knowledge.

Whenever there emerges a quest to find the purest souls in the world, you'll end up finding it in your four-legged companions.

Ever since I understood that there are other creatures called animals apart from human beings, I've loved dogs to the core.

I remember the days when everything was so easy, a group of 10-15 amazing people got together and fed each and every dog they saw. We saw their eyes filled with love and those wagging tails were the sign of how excited they were to see us.

COVID-19 has affected both people and animals alike around the world. As lockdown and physical distancing measures are enacted, more people are staying home, and most markets are closed including vital food sources for stray animals!

Apart from not getting enough resources, we were also lacking manpower as a lot of us were not able to join the feeding drives.

But we did not stop there. We all decided to feed the stray dogs of our own areas. Of course, we could not cover a lot of areas and feed all the dogs but we still tried to do everything we could in our power.

I feel immense satisfaction when I see immeasurable love for me in their eyes. Let's do our bit and savour the love they shower on us. Let's be kind and believe me God will be kinder!

When the Association was first being formulated our main objectives and goals were all focused on providing a platform for students to hone their skills and improve their knowledge in the various domains of business, As the Association grows and we as a team progress these objectives have seen a transformation where we see students applying their knowledge and excelling with such an exemplary performance.

This experience of watching us develop as a whole even during the most uncertain times has been the most enriching experience, which I will always cherish.
